Presentation

Our company offers a complete management system pack consisting of:

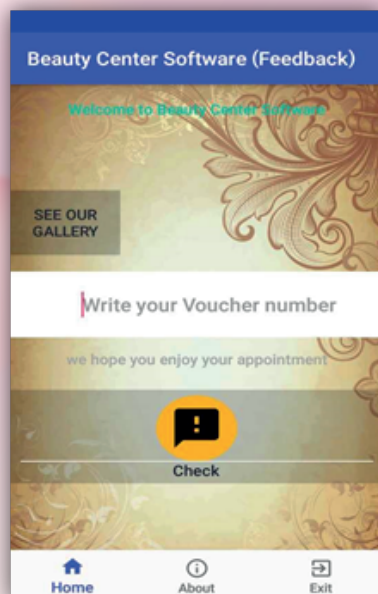

- * Desktop application.
- * Website (linked with the desktop application which allows the appointment booking).
- * Mobile feedback app
- * Appointment App.

The application was created in 2018 for beauty centers to facilitate the management of customer and employee relations.

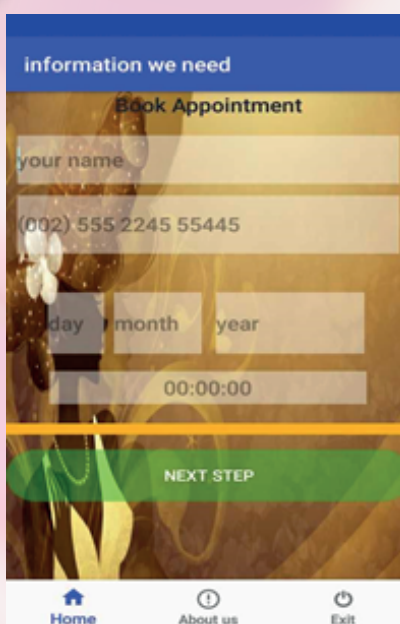

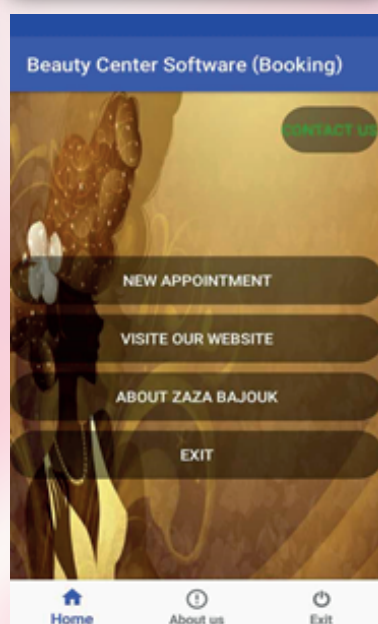

This software at the same time is powerful, customizable, intuitive, effective, evolutionary and economic will adapt to the specificities of your activity. In addition, he assists you daily with your relationship management tasks with the client. The management program will simplify your work and save your time.

Developed in close collaboration with beauty centers, our software offers you all the tools to manage your customers, products, invoices, employees and Appointments with ease.

The management of your beauty centers just a click away.

Feedback :allows the customer to access the interface by entering the Voucher number and give a score of 5 in relation to the service offered.

Appointment App Mobile App:makes it easy to make Appointment by the client as well as helping the administrator manage the customer database.

Software advantages of Beauty Centers:

Customers :

Keep your customers database up to date and have all the tools which you need to manage customer tracking and retention at your center. Our software allows you to collect all the information you need about your customers (Name and Surname, Phone number, Address, date of appointment, a normal customer or important ...) It allows you to keep track of your customers, allowing you to know them a little more after each visit. The messages received in the contact interface of the website by your customers will be automatically linked with the mobile application and you will be notified.

The screenshot shows a 'Customer' management window. At the top, there's a table with columns 'Full_name_customer', 'Birth_date', and 'Phone'. It lists several test customers. Below the table, there's a form to add or edit a customer. The form includes fields for 'Full_name_customer', 'Date_add', 'Birth_date', 'Phone', 'Country', 'Address', 'Email', and 'Login'. There are buttons for 'New', 'Delete', 'Apply', 'Cancel', and 'Close'.

Keep your customers database up to date and have all the tools which you need to manage customer tracking and retention at your center. Our software allows you to collect all the information you need about your customers (Name and Surname, Phone number, Address, date of appointment, a normal customer or important ...) It allows you to keep track of your customers, allowing you to know them a little more after each visit. The messages received in the contact interface of the website by your customers will be automatically linked with the mobile application and you will be notified.

Appointment :

The screenshot shows an 'Appointments Schedule' window. It features a calendar view with columns for different barbers (barber1, barber2, barber3, barber4, barber5) and rows for time slots from 02:00 to 19:00. A pop-up window is displayed over the calendar, asking for an 'Action on this appointment' with options: 'Invoice', 'Update', 'Cancel Appointment', and 'Do nothing'.

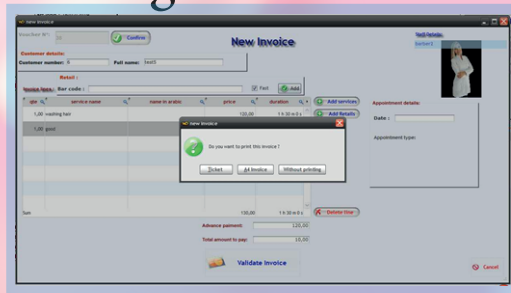

Manage your appointments easily with our beauty center software.
Manage your agenda and the work schedule of your employees.
With the online booking that is linked by the software, you allow your customers to book at home as soon as they think about it. Whether at work, on the bus or at home, they know they can book in a few clicks or from their smartphone even when you are closed.

Employees :

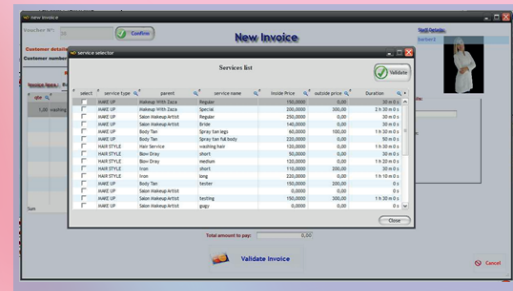

The screenshot shows an 'Employee' management window. It features a grid of employee photos. Below the grid, there's a form to add or edit an employee. The form includes fields for 'Staff ID', 'Staff name', 'Card Number', 'Date of birth', 'Note', 'Staff code', 'Base salary', 'Meal', 'Housing', 'Other', and 'Salary'. There are buttons for 'New', 'Delete', 'Apply changes', 'Cancel', and 'Close'.

Employee management will allow you to manage leave, absences, schedules and create customized activity reports through our dedicated modules

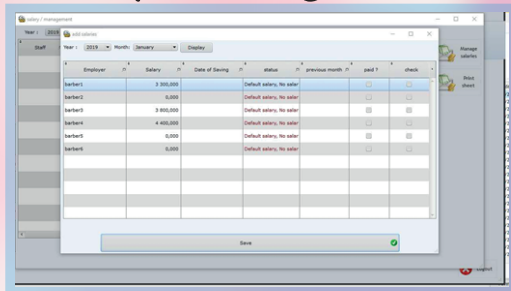

Billing :

Edit your bills, quotes and tickets
Manage your cashier.
Each service offered or product used
for a customer will automatically
be counted in its customer invoice.

Salary management :

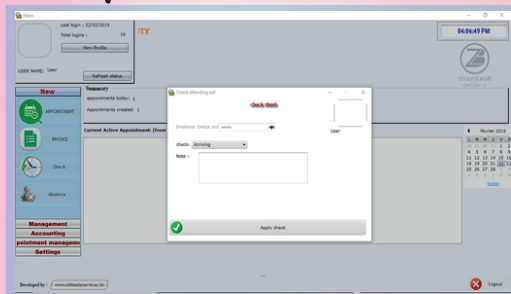

Complete employee pay slips.
Enter and manage employee salaries each month.

Service Management :

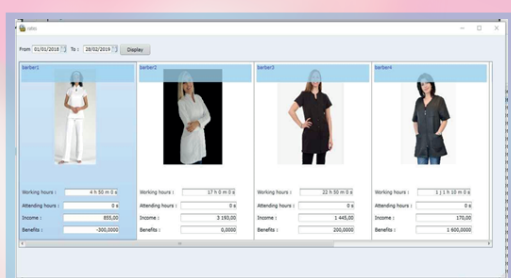

The application allows you to estimate the duration
of each service offered by the center (for example:
hair style, make up, pedicure / manicure, massage ...)
and display its price, which will help not to waste time
for planning a new appointment

Tally :

The application allows you to counting the working
hours of each employee by the use of badges

Statistics :

The center and staff statistics for daily monitoring
of the evolution of your turnover.
The software assesses each employee's performance
against their compensation.
